

GOV. MORROW WRITES

EDWIN P. MORROW

The crisis in our schools is nothing short of a national menace. Universal education is fundamental in a democracy. In the days of kings, if the sovereign had wisdom, the government was safe; but with us, the people are sovereign, what they think determines every issue of whatever nature. Unless they be well-informed, and well-informed, unless they know how to value and to appreciate American institutions and American ideals, democracy will have difficulty in enduring. The defenses of our Commonwealth, the defenses of our nation are not material, but mental and spiritual. Our first lines of defense are our public schools. Our fortifications and our soldiery can repel an invasion of armies from our shores; our greater menace, an invasion of ideas, can be repelled alone in the school room. The form of reconstruction, of which our people are in most serious need, is a reconstruction of their thoughts and of their ideals.

Kentucky is experiencing a wonderful educational revival. We have come to understand that our schools must be preserved and improved at whatever cost. The opportunities of the child living in the country must be made equal to the opportunities of the child living in the city; all the children of all the people in all the state must be given an equal chance. The teachers, whose unselfish devotion to duty has caused them to remain loyal to their task even at personal sacrifice, must be given adequate compensation. Better paid teachers will mean better prepared teachers; better prepared teachers will mean better taught children; better taught children will mean better citizenship. Our last General Assembly gave us a constructive and comprehensive program of school legislation. But laws do not enforce themselves; they are but lifeless things until public sentiment has breathed into their nostrils the breath of life. In the name of Kentucky's childhood, Kentucky's surest hope; in the name of patriotism, whose shrine is the public school, I urge the people of our Commonwealth to a generous support of, and a genuine interest in, our public schools. Education is an investment; Kentucky's greatest tax is ignorance.

Edwin P. Morrow
Governor of Kentucky

FARM POULTRY

DEMAND FOR GUINEA FOWLS

Value as Substitute for Game Birds Becoming Better Recognized by Many People.

The value of a guinea fowl as a substitute for game birds such as grouse, partridge, quail, and pheasant, is becoming more and more recognized by people fond of this class of meat, and the demand for these fowls is

Prime Young Guineas Are a Special Delicacy.

Increasing steadily. United States department of agriculture specialists report. Many hotels and restaurants in the large cities are eager to secure prime young guineas, and often they are served at banquets and club dinners as a special delicacy. When well cooked, guineas are attractive in appearance, although darker than common fowls, and the flesh of young birds is tender and of especially fine flavor, resembling that of wild game. Like all other fowl, old guineas are likely to be tough and rather dry.

A few large poultry raisers, particularly those within easy reach of the large eastern markets, make a practice of raising a hundred or so guineas each year, but the great majority of guineas are raised in small flocks of from 10 to 25 upon the Middle West and in the South. Many farmers keep a pair or a trio of guineas more as a novelty than for profit, and from such a small flock is raised. The guinea fowl doubtless would be more popular on farms were it not for its harsh and at times seemingly never-ending cry. However, some people consider this cry an argument in the guinea's favor, as it gives warning of marauders in the poultry yard.

CARE OF GROWING CHICKENS

One of Most Important Factors in Raising Poultry During Summer—Keep Them Growing.

The care of growing chicks during the summer is one of the most important factors in poultry raising. The chicks may be hatched from strong vigorous stock and carefully brooded; but unless they receive the proper attention during the warm months, their growth may be retarded. In other words, they should be so managed that they will mature into well developed fowls.

KEEP BIRDS FREE FROM LICE

Dust Thoroughly With Good Insect Powder or Apply Mixture of Vaseline and Mercury.

Examine the pullets and hens for lice, and dust thoroughly with a good insect powder or apply a mixture of two parts of vaseline and one part of mercurial or blue ointment, about the size of a pea, one inch below the vent of the bird, rubbing the mixture lightly on the skin. An application of this ointment two or three times a year will keep the fowls free from lice.

Destroy lice and mites.
Confine or sell all cockbirds.
Keep the nests clean and well littered.
Gather eggs frequently and keep them in a cool place.
Bread and milk make an excellent feed for young goslings.
Feed a well-balanced ration with plenty of variety and if possible give free range.
Eggs to be preserved should be strictly fresh, clean, unwashed, firm and free from cracks.
From 50 to 80 per cent of the chicks hatched die before they reach maturity. This loss can be greatly reduced by proper feeding and care.

The number of duck farms in this country is increasing, because of a widening of the market for young ducks, and this sort of poultry raising is growing more popular.

Firestone

Sales of this tire have increased 96% the first six months of this year, proving the balanced tire, the Firestone 3½ has accomplished what Firestone sought for it, more mileage, greater economy, greater comfort, which has been passed on to the public at low cost—most miles per dollar.

Balanced! That means to you more than mere thickness of tread, greater air capacity, more plies of fabric, greater cushioning, or the gauge of the sidewall. It means that all component parts of the Firestone 3½ are scientifically balanced by specialists who have put years of study and practice into a single purpose—to meet your demand in a small car tire. You can now have all four tires on your car give uniform service if they are Firestone.

30x3½
(non skid)

\$22.50

Gray Tube \$3.75
Red Tube \$4.50

Add Hours to Your Rest Time

It isn't the big work on the farm that keeps you on the everlasting jump—the endless little jobs do that. They have got to be done; they are absolutely necessary. But you want and need "breathing spells"—time for reading and resting.

Why not have them? The International Kerosene Engine, built by men who know your needs, gives you the power—always dependable—that will take care of these "odds and ends" and give you time to tackle the bigger problems.

The International burns kerosene successfully, which means low fuel cost. It is strong, durable, simple and safe. It wears wonderfully and supplies steady power during all its long lifetime. You have a lot of power work on your farm that must be done and that this engine will do, well and cheaply.

Then there is the matter of service and repair parts. We are glad to apply both without annoying delays. We want to be glad to show you what this engine will do for you. Come in and see it. There are four sizes—1½, 3, 6 and 10 h. p.

Colds & Headache

"For years we have used Black-Draught in our family, and I have never found any medicine that could take its place," writes Mr. H. A. Stacy, of Bradyville, Tenn. Mr. Stacy, who is a Rutherford County farmer, recommends Black-Draught as a medicine that should be kept in every household for use in the prompt treatment of many little ills to prevent them from developing into serious troubles.

THEDFORD'S BLACK-DRAUGHT

"It touches the liver and does the work," Mr. Stacy declared. "It is one of the best medicines I ever saw for a cold and headache. I don't know what we would do in our family if it wasn't for Black-Draught. It has saved us many dollars. I don't see how any family can hardly go without it. I know it is a reliable and splendid medicine to keep in the house. I recommend Black-Draught highly and am never without it."

At all druggists.
